### Description

The Dynamically Enhanced Natural Action Shower Unit is for the person who wants the full effects of dynamically enhanced structured water for their shower. The line of Dynamically Enhanced Units have a flow-form inside that is made from a combination of proprietary materials that dynamically enhance the energy of the unit and create a static energy that exists even before the water flowing through the unit is structured.

The DE Shower Unit can be installed in the shower for softer skin and all the advantages attributed to a soft water installation, without the deleterious results of the ion exchanges or brine water. It can also be a multi-use for filling water dispenser jugs or drinking glasses. In most showers this requires a special riser pipe, screwed into the stand pipe to lift it above the head. \*These statements have not been evaluated by the Food and Drug Administration.
